

SUFYAN JAMI

Full-Stack Software Developer

Calgary, AB | sufijami9@gmail.com | +1 587-437-7834 | LinkedIn | GitHub | sufyanjami.com

PROFESSIONAL SUMMARY

Full-stack software developer with more than six years of experience building SaaS products, business applications, automation systems, and migration tools. Strongest in C#.NET and TypeScript, with experience across frontend development, APIs, databases, cloud infrastructure, authentication, and payments. Applies agent-assisted engineering workflows with Claude Code and OpenAI Codex across planning, implementation, testing, refactoring, and code review.

EXPERIENCE

Full-Stack Developer | Entergrade Solutions Inc. | Remote

Dec 2023 - Present

- Developed an event-driven C#.NET API that collects Microsoft Teams call data in DynamoDB for downstream analytics; maintained more than 90% automated test coverage.
- Rebuilt the company dashboard with SvelteKit and TypeScript, establishing the shared frontend foundation used across its products.
- Implemented application security controls supporting SOC 2 compliance, including authentication hardening, access reviews, and secure session handling.
- Built core features for a managed service provider platform and centralized authentication across products with Microsoft Entra ID.

Founder & Software Engineer (Part-time) | Fairview Software | Remote

2025 - Present

- Designed and built Fairview Sites, a SaaS platform that generates and hosts websites for trade businesses using Astro, Cloudflare, and Stripe.
- Created the complete site-generation workflow, from customer intake and structured configuration to template assembly, automated builds, and deployment.
- Built LLM-powered workflows for website generation, lead research, and qualification using structured outputs and validation.
- Established an AI-assisted engineering workflow with Claude Code and OpenAI Codex for planning, implementation, testing, refactoring, and code review.

Web Developer | Canadian Bar Association | Remote

2022 - 2023

- Built and maintained features across a 13-site web platform using Kentico 13, ASP.NET Core, and MySQL.
- Created reusable content types, page components, and role-based access controls used across multiple websites.
- Improved accessibility in line with Web Content Accessibility Guidelines (WCAG) and helped establish shared development practices.

Tier 2 Forms Programmer | PBS Systems | Calgary, AB

2019 - 2022

- Developed document-generation and printing workflows used by automotive dealerships, including support for legacy hardware.
- Built internal tools that simplified customer onboarding and reduced manual work.
- Mentored junior developers through code reviews, debugging, and technical guidance.

TECHNICAL SKILLS

Languages: C#, TypeScript, JavaScript, SQL

Frontend: SvelteKit, React, Astro

Backend: ASP.NET Core, Node.js, REST APIs, Cloudflare Workers

Data and Cloud: PostgreSQL, MySQL, DynamoDB, Cloudflare D1, AWS, Azure, Cloudflare, Docker, GitHub Actions

Identity and Payments: Microsoft Entra ID, Okta, OAuth 2.0/OpenID Connect (OIDC), MSAL, Stripe

AI-Assisted Engineering: Claude Code, OpenAI Codex, LLM APIs, agentic development workflows

EDUCATION

Information Technology Diploma | SAIT (Southern Alberta Institute of Technology)
